

Boulus Constructions, Armidale is experienced in building housing projects, especially, New South Wales Land & Housing Corporation stimulus package. It is involved in most of the housing projects in Inverell, Armidale, Glen Innes, Lismore, Ballina, Tamworth and the surrounding areas building high quality and cost effective two storeyed units.

Some of the unique features include building adaptable style units catered to disabled and elderly citizens, to achieve highest comfort levels of accommodation; the interior design has stunning colours, optimising spaces provide less unutilized areas, window areas, sizes and locations offers great ventilation, the exterior design offers green soft-scaping and marvelous hard-scaping with spaces for other utilities such as bins enclosures, meters enclosures, cloth lines and garden sheds with privacy screens and metal colorbond fences provide security; retention of rainwater from roofs into large underground tanks to service the external hose taps and provision of laundry to all units, solar energy heating units and the list goes on to maximise energy efficiency to reduce carbon emissions which is complying with Australia's current national attitude to apply environmental construction procedure to build sustainable "green" homes. The company is proud to be a part of this Government initiative providing value to the community and residents in the region. The design reflects modern aesthetics including corrugated metal wall and roof cladding, feature areas of compressed fibre-cement wall cladding, hardwood timber balustrade and exposed balcony roof rafters.
